Office Action Summary	Application No. 10/796,786	Applicant(s) HAMMOND, NEAL A.
	Examiner Leslie Wong	Art Unit 1794

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on _____.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

The indicated allowability of claims 28-38 is withdrawn.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 28, 31-33, and 38 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Vannotti (CH 564315).

Vannotti (CH 564315) discloses a honey composition comprising 3-10 wt% natural honey and 40-55 wt% sorbitol (a C2-6 polyol). The overlap of 40-55 wt% and the claimed range of 35-50 wt% is sufficient to either anticipate the range or at a minimum render it obvious (MPEP 2144.05). Also, the example appears to show 48 wt% of sorbitol, which would anticipate the range.

Regarding the pH, natural honey has a pH between 3.4 to 6.1, with an average of 3.9, according to the National Honey Board (<http://www.honey.com/downloads/ph-acidsinhoney.pdf>). The addition of sugars to the honey would not be expected to change the pH, sugars being essentially neutral. Accordingly, a pH of "about 4.0" would

be either inherent to the natural honey, or obvious as being within the usual range for natural honey.

It is noted that claim 28 is open and thus does not exclude fructose, nor does it require any particular amount of the natural honey.

Claims 29, 30, and 34-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vannotti (CH 564315) in view of Staub et al (US 4379782).

Vannotti (CH 564315) discloses a honey composition comprising natural honey and an extender.

The claims differ as to the specific amounts and the specific extender employed. Staub et al (US 4379782) disclose the use of fiber and/or sorbitol in the low-calorie foods.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use either sorbitol or fiber as the extender as taught by Staub et al in that of Vannotti because the use of both fiber and sorbitol as extenders in the low-calorie food art is both known and conventional.

Once the art has recognized the combination of honey and sorbitol the use and manipulation of varying amounts is conventional and well-within the skill of the art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie Wong whose telephone number is (571)272-1411. The examiner can normally be reached on Tuesday to Friday.
